#### **DETAILED ACTION**

1. This Office Action incorporates Reasons For Allowance.
2. The Applicant's Amendment After Final filed 9/23/2008 has been entered and made of record.
3. The application has pending claim(s) 1-7, 9-13, 15-16, and 18-24.

#### **REASONS FOR ALLOWANCE**

4. The following is an examiner's statement of reasons for allowance:  
Independent claims 1, 10, 16, and 20 are allowable over the prior art of record. Claims 2-7 and 9 depend from claim 1 respectively, therefore, are allowed. Claims 11-13 and 15 depend from claim 10 respectively, therefore, are allowed. Claims 18-19 depend from claim 16 respectively, therefore, are allowed. Claims 21-24 depend from claim 20 respectively, therefore, are allowed.

Independent claims 1 and 10 respectively recite the limitations of: buffering said video signal; reading said first and second frames from the buffer directly to the analyzer; generating in said analyzer a plurality of first parameters defining a first transition portion between a first active portion and a first blank portion in said first frame; generating in said analyzer a plurality of second parameters defining a second transition portion between a second active portion and a second blank portion in said

first frame; comparing and generating a signal indicating video type based on the comparison and threshold.

Independent claim 16 respectively recites the limitations of: buffering said video signal; reading said first and second frames from the buffer directly to the analyzer; determining in said analyzer both a first size and a first position of a first truly active region; determining in said analyzer both a second size and a second position of a second truly active region; comparing and generating a signal indicating video type based on the comparison of the size and position of said truly active region.

Independent claim 20 respectively recites the limitations of: buffering said video signal; reading a first segment from the buffer directly to the analyzer; generating in said analyzer a plurality of first parameters of said first segment; reading after the end of the first segment the second segment from the buffer directly to the analyzer; generating in said analyzer a plurality of second parameters of said second segment; classifying said second segment based on the comparison of the parameters.

The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

The closest reference of Vogel (US 2003/0145320 A1) disclosed receiving video and comparing signals using different regions of a network [not one distinct video signal] to detect commercials interrupting television programs. However, Vogel does not teach the limitations cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
